Subject Index: Volume 29, 1996

Ablation procedures. *See* Catheter ablation
Accessory pathways. *See* Wolff–Parkinson–White syndrome
Action potentials. *See also* Late potentials
amphetamine affecting, 123
and border zone triggered activity, 309
Adenosine
affecting ventricular parasystole, 61
Afterdepolarizations, early
and border zone triggered activity, 309
Ambulatory ECG. *See* Holter ECG
Amiodarone
and time course of dominant frequency in ventricular fibrillation, 319
Amphetamine
affecting cardiac electrophysiology, 123
Angioplasty
balloon, and reperfusion assessment with automated ST-segment analysis, 257
bypass, and serial ECG comparison program, 265
Anisotropic propagation
in computer heart model, 73, 91
Antidromic resetting responses
in reentrant tachycardia, 149
Apnea in sleep
supraventricular tachycardia in, 65
Arrhythmias
and prognostic value of Holter ECG in asymptomatic elderly subjects, 39
in systemic scleroderma, 17
Asthmatic attack
reversible myocardial ischemia in, 337
Atria
fiber membrane potentials affected by amphetamine, 123
two distinct pacemaker sites in Wolff–Parkinson–White syndrome, 139
Atrial fibrillation
preexcitation with, 185
Atrial pacing
P wave morphology in, 1
Atrioventricular block
infrahisian, from automatic implantable defibrillator, 249
Atrioventricular node
dual pathways in supraventricular tachycardia, 155
reentry in Wenckebach conduction, 333
Balloon angioplasty
and reperfusion assessment with automated ST-segment analysis, 257
Bigeminy
concealed ventricular, 341
Biophysical factors
affecting electrocardiography, 175
Body surface mapping
in left ventricular hypertrophy, 279
QRST isointegral maps
in tetralogy of Fallot, 111
in Wolff–Parkinson–White syndrome, 301
simulated in computer heart model, 73, 91
in Wolff–Parkinson–White syndrome with two pathways and pacemaker sites, 139
Brody's theory
cardiac volume and QRS voltage amplitude in, 161, 175
Bundle branch block, right
and body surface mapping for left ventricular hypertrophy, 279
with tetralogy of Fallot, QRST isointegral maps in, 111

Carotid sinus massage
in ventricular tachycardia, 327
Case reports
adenosine effects on ventricular parasystole, 61
atrioventricular nodal reentry in Wenckebach conduction, 333
carotid sinus massage in ventricular tachycardia, 327
catheter ablation of inferoseptal accessory pathway, 55
idiopathic left ventricular tachycardia, 161
infarction in Wolff–Parkinson–White syndrome, 49
infrahisian atrioventricular block, 249
ischemic ST-segment counterpoise, 243
resetting during reentrant ventricular tachycardia, 149
simultaneous fast and slow atrioventricular conduction through dual pathways, 155
sleep apnea-induced supraventricular tachycardia, 65
ST and T wave changes during acute asthma, 337
supraventricular tachycardia with peripherally inserted central catheter, 69
ventricular extrasystoles in concealed bigeminy, 341

Case reports *(Continued)*
Wolff–Parkinson–White syndrome with two pathways and pacemaker sites, 139
Catheter ablation
in idiopathic ventricular tachycardia, 161
and QRS polarity analysis in localization of accessory pathways, 289
in Wolff–Parkinson–White syndrome
and detection of myocardial infarction, 49
for inferoseptal accessory pathway in coronary sinus, 55
Catheterization, central venous
supraventricular tachycardia from peripheral insertion in, 69
Computer analysis
heart rate variability, 45
premature responses with fibrillation onset, 213
serial ECG comparison program for Q wave infarction, 265
ventricular repolarization dispersion, 199
Computer heart models
simulation of ectopic beats, 73
simulation of regional myocardial ischemia, 91
Conduction
concealed
and atrioventricular nodal reentry, 333
and ventricular extrasystole in concealed bigeminy, 341
delays in systemic scleroderma, 17
shortened interval in resetting of reentrant tachycardia, 149
Coronary artery disease
and negative ECG response from ischemic ST-segment counterpoise, 243
reperfusion assessment with automated ST-segment analysis, 257

Defibrillator
automatic implantable, causing infrahisian atrioventricular block, 249
Diltiazem
and time course of dominant frequency in ventricular fibrillation, 319
Dissociation
longitudinal, and concealed bigeminy, 341

Ectopic beats
simulation with computer heart model, 73
Electrotonic inhibition
and concealed bigeminy, 341
Entrainment
and resetting in reentrant ventricular tachycardia, 149
Exercise
effects on parasystole, 131
Exercise ECG
false negative response from ischemic ST-segment counterpoise, 243
Extrasysoles
ventricular, in concealed bigeminy, 341

Fallot, tetralogy of
QRST isointegral maps in, 111
Fibrillation
atrial, preexcitation with, 185
threshold affected by premature responses, 213
ventricular, time course of dominant frequency affected by drugs, 319
Flecainide
and time course of dominant frequency in ventricular fibrillation, 319
Fourier analysis
and time course of dominant frequency in ventricular fibrillation, 319
Frank lead ECGs
sex differences in, 105

Heart block
atrioventricular infrahisian, from automatic implantable defibrillator, 249
right bundle branch
and body surface mapping for left ventricular hypertrophy, 279
with tetralogy of Fallot, QRST isointegral maps in, 111
Heart rate variability
related to myocardial infarction, 189
spectral analysis of, 45
Heart volume
and QRS voltage amplitude, 169
History of medicine
and role of Thomas Lewis in electrocardiography, 347
Holter ECG
accuracy of triage instrumentation in, 33
in asymptomatic elderly subjects, 39
nonsustained ventricular tachycardias in, 27
Hypertrophy
left ventricular, body surface mapping in, 279
Hypoxia
and supraventricular tachycardia in sleep apnea, 65

Infarction. *See* Myocardial infarction
Ischemia, myocardial
and negative ECG response from ST-segment counterpoise, 243
regional, simulation with computer heart model, 91
reversibility in asthmatic attack, 337

Late potentials
detection in signal-averaged ECG, 223
noise levels affecting, 235
Left ventricular hypertrophy
body surface mapping in, 279
Letter to the Editor
disappearance of right bundle branch block during exercise, 255
Lewis, Thomas
in history of electrocardiography, 347

Magnesium
effects on Wolff–Parkinson–White syndrome, 11
Multiresolution decomposition
of signal-averaged ECG, 223
Myocardial infarction
and border zone triggered activity in Purkinje fiber segments, 309
detection in Wolff–Parkinson–White syndrome, 49
and heart rate variability, 189
and occlusion detection with automated ST-segment analysis, 257
in right ventricular anterior wall, ECG diagnosis of, 119
and serial ECG comparison program, 265

Noise level
affecting signal-averaged ECG, 235

Orthodromic resetting responses
in reentrant tachycardia, 149

P wave
morphology during atrial pacing, 1
Pacing
atrial, P wave morphology in, 1
Parasystole, ventricular
adenosine affecting, 61
exercise affecting, 131
Physiologic factors
affecting electrocardiography, 175
Potassium
effects on Wolff–Parkinson–White syndrome, 11
Precordial electrode placement
variability of, 179
Preexcitation. *See also* Wolff–Parkinson–White syndrome
atrial fibrillation in, 185
Premature responses
and onset of fibrillation, 213
Programmed extrastimulation
and resetting of reentrant tachycardia, 149
Purkinje fiber segments
border zone triggered activity in, 309

Q waves
in serial ECG comparison program, 265
QRS complex
duration and repolarization in Wolff–Parkinson–White syndrome, 301
morphology in nonsustained ventricular tachycardia during Holter monitoring, 27
narrow duration in ventricular tachycardia, 161
polarity analysis in localization of accessory pathways, 289
simulated integral maps from endocardial and epicardial sites, 73
voltage amplitude related to heart dimensions, 169
QRST isointegral maps
in tetralogy of Fallot, 111
in Wolff–Parkinson–White syndrome, 301
QT interval
dispersion in ventricular repolarization, 199

Radiofrequency catheter ablation. *See* Catheter ablation
Reciprocal ST-segment changes
in simulated regional ischemia, 91
Reentrant tachycardia
antidromic and orthodromic resetting responses in, 149
supraventricular, P wave morphology in, 1
Reentry
atrioventricular nodal, in Wenckebach conduction, 333
Repolarization
QRS abnormalities in Wolff–Parkinson–White syndrome, 301
ventricular, dispersion of, 199
Right ventricle
infarction of anterior wall, ECG diagnosis of, 119
pressure overload in repaired tetralogy of Fallot with right bundle branch block, 111

Scleroderma, systemic
electrophysiologic abnormalities in, 17
Serial ECGs
comparison program for Q wave infarction, 265
Sex differences
in Frank lead ECGs, 105
Shock
endocavitary, and atrioventricular block from implantable defibrillator, 249

Signal-averaged ECG
multiresolution decomposition of, 223
noise level affecting, 235
sex differences in, 105
Sinus node
automaticity affected by amphetamine, 123
function in systemic scleroderma, 17
Sleep apnea
supraventricular tachycardia in, 65
Spectral analysis
of heart rate variability, 45
and time course of dominant frequency in ventricular fibrillation, 319
ST-segment
automated real-time analysis program, 257
changes in acute asthmatic attack, 337
ischemic counterpoise causing negative exercise stress test, 243
reciprocal changes in simulated regional ischemia, 91
Supraventricular tachycardia
dual atrioventricular nodal pathways in, 155
in obstructive sleep apnea, 65
from peripherally inserted central catheter, 69
reentrant, P wave morphology in, 1

T wave
changes in acute asthmatic attack, 337
Tachycardia
supraventricular. *See* Supraventricular tachycardia
ventricular. *See* Ventricular tachycardia
Tetralogy of Fallot
QRST isointegral maps in, 111
Thallium-201 scintigraphy
positive test with negative exercise stress ECG, 243
Triggered activity
in border zones of Purkinje fiber segments, 309

Vagal activity
in simultaneous conduction through dual AV nodal pathways, 155
Vectorcardiography
cardiac volume and QRS voltage amplitude in, 161
Ventricles
left, hypertrophy of, body surface mapping in, 279
repolarization dispersion study, 199
right
infarction of anterior wall, ECG diagnosis of, 119
pressure overload in repaired tetralogy of Fallot with right bundle branch block, 111
Ventricular extrasystole
in concealed bigeminy, 341
Ventricular fibrillation
time course of dominant frequency affected by drugs, 319
Ventricular parasystole
adenosine affecting, 61
exercise affecting, 131
Ventricular tachycardia
carotid sinus massage in, 327
narrow QRS duration in, 161
nonsustained, in Holter monitoring, 27
reentrant, atypical antidromic resetting in, 149

Wavelet transform
and multiresolution signal decomposition, 223
Wenckebach conduction
atrioventricular nodal reentry in, 333
Wolff–Parkinson–White syndrome
and ablation of inferoseptal accessory pathway in coronary sinus, 55
magnesium and potassium affecting, 11
myocardial infarction detection in, 49
QRS duration and repolarization in, 301
and QRS polarity analysis in localization of accessory pathways, 289
two pathways and pacemaker sites in, body surface maps of, 139
